

Hultafors launches ergonomic Dead blow hammer

Hultafors has developed a Dead blow hammer with an ergonomic handle made of Santoprene. Now, craftsmen can work with power and precision even with oily or wet hands.

Whether the Dead blow hammer is used on a construction site, in the automotive industry or in an environment with a risk of explosion, the user can feel secure knowing that the Dead blow hammer delivers. Hultafors has developed an ergonomic Dead blow hammer that is free from generating sparks and reduces the blow and the recoil allowing the user to apply the optimal striking force with minimal effort.

- Our Dead blow hammers have a Santoprene handle that provides an optimal grip, reduces the risk of repetitive strain injury and improves the craftsman's working environment. We are constantly working to develop new solutions that will facilitate the everyday life of craftsmen and our dead blow hammer series is no exception with their great looks and fantastic grips, says Håkan Carlsson, product manager at Hultafors.

Product information:

Hultafors hammer DB has a Urethane covered head making it free from sparks and careful towards the work piece. The hammer head is filled with steel balls that absorbs impact and reduces the recoil. The handle is ergonomically designed in Santoprene which gives an optimal grip. The flat surface on the top of the head enables the hammer to be stored upright.
