IN EVERY WAY, A PARTNER TO RELY ON

Sharp, reliable and always at hand

Hultafors introduces Chisels EDC for demanding craftsmen

The new Chisels EDC range by Hultafors: Sharp, reliable and always at hand.

Professional craftsmen no longer use their chisels for just carving wood. Instead, the chisel has become an all-round tool used for anything from chopping to prying and scraping. As a response to this trend Hultafors now launches Chisels EDC – an all-new product range carefully designed to combine maximum sharpness with hard-wearing durability.

“Tough, versatile and highly ergonomic. These products will make a great addition to any toolbox,” says Håkan Carlsson, Product Manager at Hultafors.

During a recent study of professional craftsmen in action, Hultafors identified an apparent need for agile chisels that are both easy to carry and suitable for all-round work. Builders, carpenters, floor-layers, roofers, locksmiths and painters basically all asked for the same thing – a chisel blade that can take a beating and a handle that is unafraid of the hammer.

“The Chisels EDC is made of perfectly sharpened Japanese steel and a heavy-duty handle, made of glass-fiber reinforced PP-plastic, that can stand even the most hard-hitting treatment. The blade tangs are provided with barbs to prevent the blade from being forced inside the handle when hitting, making the chisel feel and perform as one solid part. In addition, to make them all highly accessible, we have also designed a smart new holster that can be easily attached to a belt, pocket, or jeans-button. “All in all, every function needed – right at hand,” says Håkan Carlsson.

The new range of chisels includes several blade sizes, from 6mm to 32mm. To facilitate handling, the blades have no sharp corners and the shape of the handle forces correct hand placement. Moreover; the range also contains a curved incannel gouge, sharpened on the inside, giving a precise 11mm radius every time – and a curved outcannel gouge version, sharpened on the outside, which makes it perfect for carving cable ditches.

The user study also revealed that quick access to one’s favorite chisels is a major priority. Therefore, Hultafors now also introduces a unique 3-chisel holder. An innovative product, attachable right to your belt or stored in the toolbox, that keeps your most used chisels closely together at all times.

This is Chisels EDC by Hultafors:

- Durable and perfectly sharpened Japanese steel blades. Electrodeposition coated for maximum rust protection.
- Heavy-duty handle, designed to withstand frequent and powerful hammer blows.
- Blades with an oval shape to facilitate “twisting” away different materials.
- Sizes from 6mm to 32mm including two special chisels (gouges) with cupped blades.
- Holster made from durable PP plastic – with vent holes for fast dehumidifying and easy identification of chisel size. Can be attached to a button, belt or a pocket.
- Double holster complete with chisel EDC 25 and a craftsman’s knife HVK.
- A unique chisel holder CH3 made from hardwearing leather, keeping your 3 favorite chisels.

Introducing the IGC incannel gouge by Hultafors: *The locksmith's new best friend.*

Sharp, reliable and always at hand when installing lock cases and hinges in wooden doors – that's the new EDC incannel gouge by Hultafors. In short, the locksmith's new best friend. Using a drill to finish radiuses is about to become an obsolete technique.

"Get ready for an all-new level of precision," says Håkan Carlsson, Product Manager at Hultafors.

The new EDC incannel gouge by Hultafors will be a real treat for precision craving locksmiths. The new product features a high-quality Japanese steel blade, a heavy-duty handle designed to withstand frequent hammer blows and a smart holster for easy access at all times.

The blade tangs are provided with barbs to prevent the blade from being forced inside the handle when hitting, making the chisel feel and perform as one solid part. This curved chisel, sharpened on the inside, gives a precise 11mm radius every time, with just one hit, this effectively improves the work when installing 22mm lock cases or hinges. "From now on, locksmiths all around the world can rely on an all-new level of precision and efficiency when finishing radiuses. And in addition, to make the gouge highly accessible, we have also designed a smart new holster that can be easily attached to a pocket, belt or jeans-button. "All in all, every function needed – right at hand," says Håkan Carlsson.

A recent user study by Hultafors also revealed that quick access to a few favorite chisels is a major priority. Therefore, the company now also introduces a unique 3-chisel holder. An innovative product, attachable right to your belt or stored in the toolbox, that keeps your most used chisels closely together at all times.

This is the IGC incannel gouge from Hultafors:

- Made to finish radiuses in the most efficient way possible.
- Durable and high-quality Japanese steel blade.
- Electrodeposition coated for increased rust protection.
- Heavy-duty handle, designed to withstand frequent and powerful hammer blows.
- Perfectly curved outside – sharpened on the inside.
- Holster made from durable PP plastic – with vent holes for fast dehumidifying and easy identification of chisel size. Can be attached to a belt or button.
- Triple chisel holder made from hardwearing leather, keeping your favorite chisels together for easy access.
